Skin Refreshing!

Make your skin and scalp cleaner and whiter.

Hydro Peeling System

Aqua Sonic

Remove horny substances and supply moisture at the same time.

Aqua sonic is designed to promote exfoliation to remove aged dead skin cells and sebum the same time, injects highly concentrated, nutritious serum to make skin and scalp moist, smooth, and lustrous.

Safe, no downtime, no side effect.

Because the treatment does not cause any damage to skin and scalp, patients can lead a normal life just after treatment. Also there is no side effect such as injury, pain, burns, rash, etc.

Multiple skincare effects.

Treatment removes foreign materials such as cosmetics and sebum.

Therefore, it is expected to achieve whitening and pore-tightening effects.

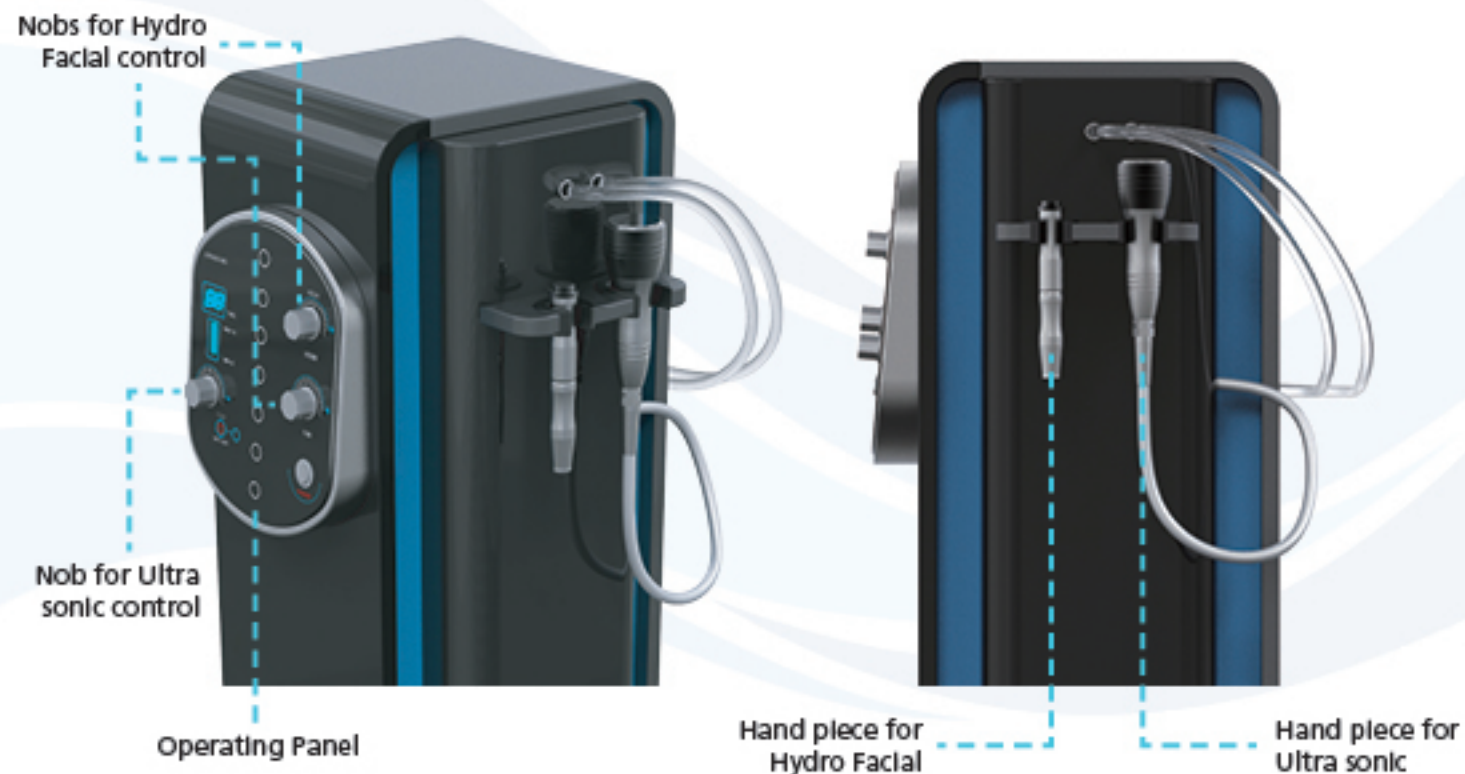

User Manual for Aqua Sonic

Aqua Sonic adopts a vacuum extrusion method. Therefore, the handpiece should be contacted to the skin closely. You can control pressure for both of fine bubbles and serum liquid to perform treatment. Red marks on the skin those may be created during operation will disappear normally in 20-30 minutes after treatment. And the skin will become healthy and lustrous condition.

Aqua Sonic is ...

not a conventional decortication,
but a new-concept natural skincare system.

Parts and components

- 01 Cleansing** Wipe wastes on the face 2-3 times with a cleansing cream
- 02 Diagnosis of scalp and skin and Selection of serum** Check the skin if normal, oily, sensitive, or of acne type and then select the serum suitable for the skin type.
- 03 Treatment [removal of keratin and sebum]** First spread the selected fine bubble and serum over the face and then divide the face into 3-5 areas to start treatment for about 2 minutes.
- 04 Washing** Wash and wipe out the face cleanly with a sponge after treatment.
- 05 Treatment (supply of moisture and nutrients) and finish** Treat to let serum penetrate into the skin; After treatment, give a finishing touch with a skin balm or a nourishing cream.

How to Treat ?

Recommended treatment is kept on around 2 minutes in the order of ;

In the order of Neck >>> Chin >>>> Cheek >>>>> Forehead >>>>>> Nose

- Neck :** Turning face a little to the right and left , make the lymph nodes relax by massaging the neck up to down and down to up.
- Chin :** Massage the chin area from bottom to upper part, not to the opposite direction.
- Cheek :** Massage this part from nose to outside.

- Forehead :** Massage Forehead down to up and in to out direction.
- Nose :** A lot of sebum is near the nose. Therefore, more massages are needed for this area. Massage both sides of the nose making small circles.
- Full Face :** Finally massage across the full face from bottom to top smoothly.

Special tips

For removal of keratin as well as for extrusion

Whole face

Around the nose

The special tip of the Aqua Sonic consists of two suction holes and one serum discharge hole. Its specially-designed spiral tip is intended to hold a product long enough to soften dead cells of the scalp and skin, provide nutrients, and absorb them in a vacuum state to maximize its peeling and extrusion effects.

Aqua Sonic Serum

AQUA PE

Dr.Serum

AQUA PE [For all Skin Type-For the general skin, 30ml]
